Maths	<p>LO: To use subtraction to work out word problems.</p> <p>Today your child is going to be applying their subtraction skills from yesterday's learning to word problems. If useful you can watch the video about subtraction on the school website from yesterday's learning.</p> <p>Next encourage your child to read each word problem or you can read each word problem together. See if they can write a subtraction number sentence for each one. Then ask your child to work each answer out.</p>
English	<p>LO: To learn and to be able to use common exception words.</p> <p>Today the English learning is going to focus on 5 of the common exception words for your child's year group. These common exception words are words your child must learn, they are words that do not follow phonics so just have to be learnt by knowing them.</p> <p>Start by watching the video which introduces today's 5 common exception word. The video is on the home learning section for Robins on the school website.</p> <p>Then can your child complete the worksheet provided. You do not need to print this worksheet as the learning can be written and completed in your lined workbook provided in the home learning packs.</p>
Yoga/ Wellbeing	<p>LO: To develop yoga skills whilst focusing on wellbeing.</p> <p>Let your child watch and take part in the safari yoga session on the school website. The actual yoga session does not start until 4 minutes 25 seconds so you may want to skip straight to that time.</p> <p>I hope your child enjoys the safari adventure.</p>
Additional activities	<ul style="list-style-type: none">• Practice your x2, x5 or x10 timetables.• Practice your number bonds to both 10 and 20.• If you are able maybe you could complete the daily mile.
