

LO: To be able to compare capacity practically.

Capacity

Have a go at completing the questions.

Find some containers at home and answer the questions in the same way but by answering them practically and take pictures.

1. Find 2 different containers, label which container has the smallest capacity.
2. Find 2 different containers, label which container has the greatest capacity.
3. Find 3 different containers, label which container has the greatest capacity.
4. Find 3 different containers, label which container has the smallest capacity.

Remember to take lots of pictures.
